

STEAM FREE MIRROR ENSURES A CLOSE SHAVE

Get a really close shave when your mirror is free from steam. For some, the daily grooming can be boring and tiresome, made even more difficult if the bathroom mirror is steaming up. A **demista™** heated mirror pad, fixed neatly behind the bathroom mirror, will ensure a clean, steam free view in even the steamiest of bathrooms.

The self adhesive pads, available in a variety of sizes to fit virtually all mirrors, are easy to install and simple to operate, by either connecting to the bathroom lighting or to a separate switch.

Prices start from under £25.00 and running costs are minimal. No maintenance is required and the mirror will remain free of condensation forever. Approved to all required standards.
