

HISTORIC REFURBISHMENT GAINS STEAM-FREE BATHROOM MIRRORS

Steam-free mirrors with heated mirror pads by *demista™* were an integral feature in the recent upgrading of the residential accommodation at the historic Royal Society of Medicine building in London opened in 1912 by King George V and Queen Mary.

The entire project involved the upgrade of 41 bedrooms to 5-star standard, including new bathrooms with *demista™*, air conditioning and temperature controlled rooms. Also created were four new bedrooms including one suite plus two new fully-accessible bedrooms that comply with the Disability Discrimination Act. The project was carried out from design concept to completion in 15 weeks by Fileturn Limited.

Bathroom at The Royal Society of Medicine

demista™ heated mirror pads are specified worldwide for residential dwellings, hotels, boats, sports facilities. These simple ultra slim heating

pads come in a very wide range of sizes and can also be custom-made to special order. They conform to all international standards and are very low cost to run – 32 hours for 1p.
